

Coronavirus Alert!!!

What precautions are you taking?

2019-nCoV and what you should know....

The American Academy of Ophthalmology

Wuhan coronavirus: What we need to know to ensure proper care for our patients

Steps on managing and evaluating patients with red eyes and conjunctivitis includes checking respiratory symptoms and questioning travel history. Anecdotal reports the virus to be transmitted by aerosol contact with conjunctiva. Protection of mouth, nose and eyes have been recommended...[Read more about it](#)

2020 Mini-Symposium, CEs, AGM and Annual Dinner postponed until further notice

Stay up-to-date with [Centre Health Protection](#) Department of Health (HKSAR) on the coronavirus
