FDA for myopia management

- Ortho-k lens abiliti
- Spectacle Lens Stellest

'abiliti lens' is the first orthokeratology lens approved by FDA for myopia management. It is an overnight therapeutic lens from collaboration between Johnson & Johnson and Menicon available in spherical and toric design.

Stellest received "breakthrough device" for spectacle lens solution for the fight against myopia.

First orthok lens for Myopia management

With more and more advancement, the **abiliti** lens is the first orthokeratology lens approved by FDA for myopia management.

It is an overnight therapeutic lens from collaboration between Johnson & Johnson and Menicon available in spherical and toric design optimized by the software usage corneal topography measurements.

Stellest received “breakthrough device” for spectacle lens solution for the fight against myopia.

- “H.A.L.T.” technology by Essilor consists of 11 rings
- Interim findings from Eye Hospital of Wenzhou Medical University show significant slowdown of myopia progression
